

The Impact on our operations by the Pacific Coast of Tohoku Earthquake and our support for the afflicted areas

Mar. 22, 2011

The earthquake and subsequent tsunami which hit last Friday, March 11th, were unprecedented in size, causing people in the Eastern parts of Japan to suffer huge losses and wreaking tremendous damage on the country of Japan as a whole. We would like to extend our condolences to those who were affected by this tragedy.

We would like to inform you that all staff from NASA Corporation and our families are safe.

However, delay of delivery may occur because of planned electrical outage and failure of transportation. We are trying our best to prevent any delay yet we will inform you in advance if the delay is foreseen by any irresistible reasons caused by the natural disaster.

We sincerely apologize for causing you any inconvenience.

Your understanding and patience is highly appreciated.

Even now there are a great many people who are still suffering from the aftereffects of this disaster.

After giving thought to NASA may be able to aid the victims of the disaster and assist in the rebuilding of the affected areas, a humble contribution of 1,000,000 JPY was donated to the Red Cross of Japan in our company's name.

Since the evening of the disaster, we have received many messages from our customers and clients around the world inquiring about our safety and also offering words of encouragement and all of us here at NASA could not help but be deeply moved with this outpouring of compassion. For this, I would like to offer my deep gratitude.

Having received messages like this every day has inspired us to call on all of our customers and clients around the world to make donations that will result in this compassion being directed to those who are most in need, the citizens of northern Japan.

It is my hope that through your contributions, those affected will receive the assistance they need as soon as possible and the country of Japan as a whole will be able to overcome this difficult period.

----- Let's unite and save Tohoku !! Save Japan !! -----

Even donating just \$1 has a great deal of meaning to the victims of this disaster who now, without homes and left out in the cold, are dealing with food shortages.

Please refer to the below sites if you are considering donating.
